## DETAILED ACTION

The Preliminary Amendment filed November 18<sup>th</sup>, 2005 is noted. However the amendment has not been entered due to missing pages, specifically page 8.

### ***Claim Objections***

1. Claims 6-14 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 6-14 not been further treated on the merits.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Fuller (US 4,823,892).

Regarding claim 1: Fuller discloses a drill bit for drilling into a subterranean earth formation, the drill bit having a central longitudinal axis and being operable by applying a rotary motion about the axis, the drill bit comprising: a plurality of blades **11** protruding from the drill bit; a plurality of flow channels **12** stretching along the drill bit in a substantially radial direction whereby the successive flow channels are formed between two adjacent blades; shear cutters **15** which are provided in a row on or close to the leading edge of at least one of said blades with respect to the direction of rotary motion trailing adjacent to the flow channel that is associated with it, for running a fluid through and thereby removing cutting debris accumulating in front of the row of shear cutters; and in addition to these shear cutters; and axial cutters **16** which are located, with respect to the direction of rotary motion, in a trailing position with respect to said row of shear cutters and its associated flow channel.

Regarding claim 2: The axial cutters are provided ahead of the subsequent neighboring flow channel with respect to the direction of rotary motion.

Regarding claim 3: The subsequent neighboring flow channel is associated with a second row of shear cutters provided on the leading edge of the subsequent blade to the said at least one blade.

Regarding claim 4: The axial cutters are located on the same blade as the shear cutters.

Regarding claim 5: The axial cutters comprise dome shaped or essentially hemispherical shaped cutting surfaces.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3672

5. Claims 1-14 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of copending Application No. 10/557404 and claims 1-20 of copending Application No. 10/559909. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims contain essential the same subject matter written in various scope and terminology.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
